

Instant Automation & Collaboration Suite for PowerShell

SMART. SIMPLE. SECURE.

Scripting should be fun again! Is that your dream? Developing scripts once and issuing them to colleagues, other admin teams or the help desk for joint use and execution.

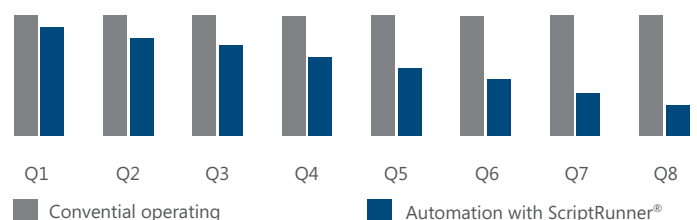

ScriptRunner® makes all that possible. The software supports admin staff, system administrators and DevOps teams in the development, management, execution, monitoring and delegation of daily administration tasks. The simple automation of routine tasks with ScriptRunner® leads to more efficiency and higher quality, whether in the private, public or hybrid cloud.

AUTOMATION IS WORTH IT.

70% time-saving in recurrent operations speaks for itself. By using ScriptRunner®, a return on investment will be achieved in less than twelve months.

COST PER QUARTER

THE KEY FUNCTIONS PRESENTED BRIEFLY.

AUTOMATE

Expand ScriptRunner[®] with optional interfaces and integrate your monitoring, IT service management, ticketing, rights management system etc. in order to create a fully automated regulatory cycle in your IT operations.

DELEGATE

Deposit frequently required scripts centrally and activate them for easy use by support staff and the help desk with a button click. All the while, system security is maintained at all times.

EXECUTE

Count on execution policies for the execution of scripts in PowerShell, VBS, SSH etc., avoid incorrect execution with automation and use scripts in the team.

MONITOR

Measure the performance and success of your scripts using real-time evaluation, graphic analyses and execution histories, and keep an overview of users, user accounts and much more.

MANAGE

Manage scripts, target systems, access and other actions centrally in only one solution. You will benefit from quick traceability and the testing of scripts and their versions for ease of use and validity.

DEVELOP

Develop and work on your PowerShell scripts with ISE integration via check in/out in the central script library. In doing so, you will always retain an overview of tested and authorised scripts, as well as their versions or templates.

As a managed services provider, we operate complete infrastructures for our clients. We automate complex regulation cycles with integration in our monitoring environment. ScriptRunner[®] reduces costs and ensures increased quality in our administration and support tasks."

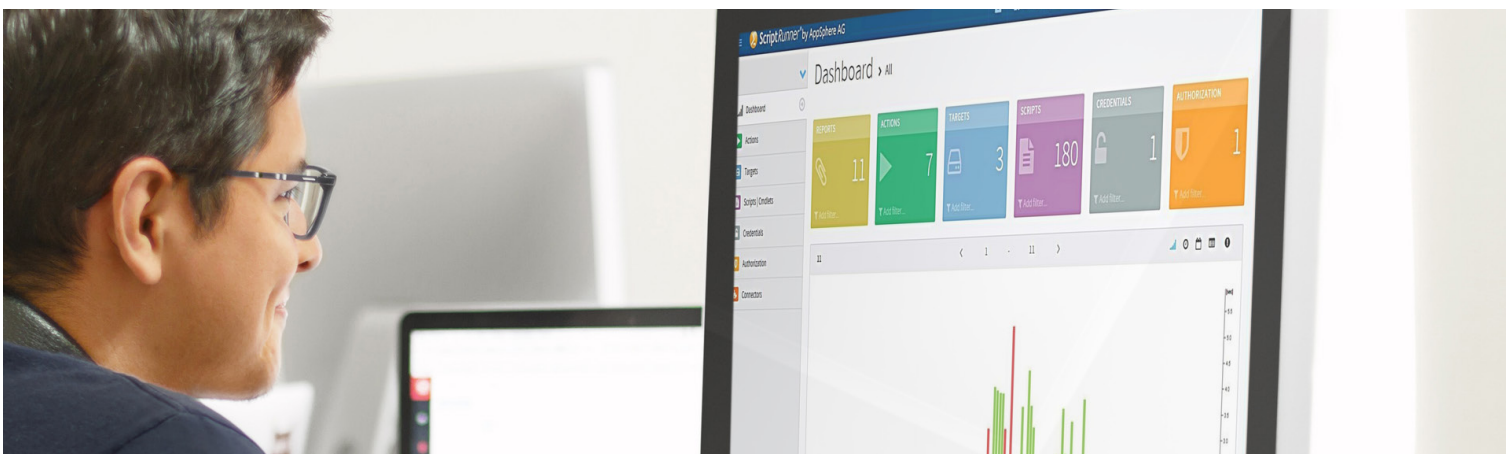

Andreas Engmann, VINTIN Services GmbH, Business Development

BENEFITS

- Advantage of diverse potential for efficiency via the quick automation of IT tasks
- Reduced expenditure for administrative tasks and corrective measures with PowerShell
- Holistic and consistent platform for cooperation in the DevOps team
- Quick development, simple use, controlled execution of PowerShell scripts
- Secure delegation to help desk, support staff and end users
- Strict execution and control measures via policies for PowerShell
- Transparent comprehensibility
- Error and risk reduction via 100% reproducibility

INSTANT AUTOMATION WITH SCRIPTRUNNER

- Comprehensive support for applications such as Microsoft Exchange, SharePoint, SQL Server, System Center, VMware, Citrix etc.
- Interfaces and functions for the integration of monitoring, IT service management and ticketing systems, as well as rights management
- System requirements: Windows Server 2012 R2, Internet Explorer 11

LICENSING.

ScriptRunner® is available in two different editions. Choose between the Corporate Suite and the Small Team Edition. Corporate Suite, with its development options, is the ideal automation solution for medium-sized and large companies. The Small Team Edition supports small teams. If the requirements increase, it can be upgraded to Corporate Suite at any time.

ABOUT APPSPHERE

AppSphere AG implements mobile and future-orientated IT workplace concepts and solutions, and supports its clients in the transformation of business processes in an increasingly digitalised world.

With a holistic approach to business processes, years of expertise and in-depth technical knowledge of virtualization & access, systems management, collaboration & information management, and mobility & cloud, AppSphere is creating the next generation workplace for its customers. This enables agile, secure and efficient work, increases the productivity of employees and therefore the economic efficiency and competitiveness of any company – we continue where others stop! Renowned medium-sized and large companies from various different industries have been relying on the problem-solving skills of the 70-person team since AppSphere AG was founded in 2010. As a digital workplace specialist, our portfolio appeal is underpinned by various distinctions from well-known market research companies.

Knowledge of the standardisation and automation of operating processes is expressed in the ScriptRunner[®] solution, developed by AppSphere. The Instant Automation & Collaboration Suite for PowerShell supports IT administrators, systems managers and DevOps teams in the efficient, fast and high-quality administration of systems in the private, hybrid and public cloud.

Do you need a live test or a free 30-day test license, or do you want to intensify your involvement in the scripting of the future with our PowerShell training? Get in touch!

ScriptRunner[®] is a product of AppSphere AG.
